

Omni® KOPkit Keep On Pumping Kit

Omni® KOPkits contain all replacement parts normally used in a preventative maintenance program. There is a specific KOPkit for every Omni® pump model. Each KOPkit is packaged for extended storage. All Omni® pumps have the KOPkit number identified on the pump nameplate and Pulsafeeder order documents. For models with tie-bar type check valves, the appropriate components (check valve balls, seats, and o-rings) are supplied instead of the cartridges.

Operating Benefits

- Reduce downtime.
- Save money by ordering a KOPkit instead of individual parts.
- Needed wetend parts for maintenance in one part number.

How To Order:

Omni® (all models) - The KOPkit number is identified by the model number of the pump, the wetted end material, and the process connection thread type using the chart below.
