# CoolerGuard

## CoolerGuard

Is an easy to use time-release descaler. Our non dissolving polymer core sits in the sump. When water contacts the surface, CoolerGuard releases descalers and cleaners into the sump water. The units' pump then circulates the descaler throughout the pad.

- Water Activated
- Non-dissolving polymer
- Releases cleaning agents, dispersant, and descalers
- Time-Release±, each CoolerGuard lasts 30 days

Scaled pad surfaces decrease the units' efficiency and increase the potential of moisture getting into the air stream.

## CoolerGuard

- Dissolves old scale
- Prevents New scale
- Cleans and prevents buildup
- Maintains pads, preventing loss of unit efficiency

## Our Product

- Cleans wherever the water reaches
- Dissolves build up that causes corrosion
- Guards against future deposits
- Extends cooler pad life indefinitely
- Provides a fresh cooling environment
- Keeps units clean and trouble free
- pH neutral to preserve pad life
- Maximizes air flow for top efficiency.

## CoolerGuard is for use in all Evaporative Coolers, such as:

- Greenhouses
- Farming
- Housing
- Portable Coolers

## Plus CoolerGuard

- Saves time
- Saves Money
- Saves Pads
- Saves hassle
- And water too
