

# Pocket PAL series

The PAL is a completely newly designed digital hand-held instrument that will change the traditional conceptions of refractometers.

● Dimensions and weight : 55×31×109mm, 100g

## DIGITAL HAND-HELD "POCKET" REFRACTOMETERS

**PAL-1** Cat.No. 3810

**PAL-2** Cat.No. 3820

**PAL-3** Cat.No. 3830

**PAL-α** Cat.No. 3840

### Feature

- Calibration with water only
- Extremely water resistant (IP65)
- Light & Compact, 100g
- Revolutionary new feature ELI\*
- Automatic Temperature Compensation (A.T.C.)
- Measurement in 3 seconds
- Ergonomically designed for one-handed operation
- Equipped with a strap holder option
- Convenient storage case

\* External Light Interference (ELI) - Patent Pending

Everyone is talking about the new "Pocket" as featured on recent TV programs and Magazines

Always clean and shiny!!  
Can be easily rinsed under running water.

Patent for Design Registration No. ZL200310103015.2 (China)  
Patent for Invention Registration No. ZL03303431.1 (China), 089244 (Taiwan)  
Patent pending in U.S.A., and Germany and all other countries around the world.

## Digital Hand-held "Pocket" Refractometers (Special Scales)

| Model       | Scale             |
|-------------|-------------------|
| <b>Brix</b> |                   |
| PAL-1       | Brix (0.0~53.0%)  |
| PAL-2       | Brix (45.0~93.0%) |
| PAL-3       | Brix (0.0~93.0%)  |
| PAL-α       | Brix (0.0~85.0%)  |

|               |                                    |
|---------------|------------------------------------|
| <b>Sugars</b> |                                    |
| PAL-12S       | Dextran                            |
| PAL-14S       | Fructose                           |
| PAL-15S       | Glucose                            |
| PAL-16S       | High Fructose Corn Syrup (HFCS-42) |
| PAL-17S       | High Fructose Corn Syrup (HFCS-55) |
| PAL-18S       | Inverted sugar                     |
| PAL-19S       | Lactose                            |
| PAL-20S       | Maltose                            |

|              |                |
|--------------|----------------|
| <b>Honey</b> |                |
| PAL-22S      | Honey moisture |

|                                               |                              |
|-----------------------------------------------|------------------------------|
| <b>Soy milk, Bittern (Magnesium chloride)</b> |                              |

#### MASTER SERIES REFRACTOMETER (WATER RESISTANT & A.T.C.)

##### MASTER-α Cat.No. 2311

NEW

This new type of Hand-Held refractometer is the first to be equipped with Automatic Temperature Compensation and Water Resistant (IP65) at the same time. While featuring functions such as Easy-to-Read, Easy-to-Hold, Smooth sampling, Easy disposal of sample from the edge, the improvement of hygiene aspect by employing the new type of grip, and well balanced structure, emphasis is also placed on its design, well exemplified by the streamlined body and the strong grip with rich texture.

#### MASTER SERIES REFRACTOMETER (WATER RESISTANT & A.T.C.)

##### MASTER-2α Cat.No. 2321

NEW

MASTER-2α is mid-range measurement range Brix 28.0 to 62.0% model of the MASTER-α. It is convenient for measuring a variety of sauces, soy sauce, seasoning in liquid form as well as for low-sugar jams and spreads. It is an Automatic Temperature Compensation (A.T.C.) model with water resistant properties (IP65).

|                                |                                                              |
|--------------------------------|--------------------------------------------------------------|
| Scale range                    | : Brix 28.0 to 62.0%<br>(Automatic Temperature Compensation) |
| Minimum scale                  | : 0.2%                                                       |
| Accuracy                       | : $\pm 0.2\%$ (10 to 30°C)                                   |

#### MASTER SERIES REFRACTOMETER (A.T.C.)

##### MASTER-T Cat.No. 2312

NEW

This is the successor model to the conventional ATC-1E. Automatic Temperature Compensation feature only. The Master-T is a good alternative choice when the water resistant feature is not a priority.

|                 |                                                             |
|-----------------|-------------------------------------------------------------|
| Scale range     | : Brix 0.0 to 33.0%<br>(Automatic Temperature Compensation) |
| Minimum scale   | : 0.2%                                                      |
| Accuracy        | : $\pm 0.2\%$ (10 to 30°C)                                  |
| Repeatability   | : Brix $\pm 0.1\%$                                          |
| Size and weight | : 3.3×3.3×20.4cm, 160g                                      |

#### MASTER SERIES REFRACTOMETER (A.T.C.)

##### MASTER-2T Cat.No. 2322

NEW

MASTER-2T is mid-range model of the MASTER-T. Automatic Temperature Compensation feature only. The Master-T is a good alternative choice when the water resistant feature is not a priority.

|                 |                                                              |
|-----------------|--------------------------------------------------------------|
| Scale range     | : Brix 28.0 to 62.0%<br>(Automatic Temperature Compensation) |
| Minimum scale   | : 0.2%                                                       |
| Accuracy        | : $\pm 0.2\%$ (10 to 30°C)                                   |
| Repeatability   | : Brix $\pm 0.1\%$                                           |
| Size and weight | : 3.3×3.3×20.4cm, 160g                                       |

#### MASTER SERIES REFRACTOMETER

##### MASTER-M Cat.No. 2313

NEW

This is the successor model to the conventional N-1α. The Master-M is a good alternative choice when the water resistant feature is not a priority and the Temperature Compensation will be carried out manually. Not equipped with the Automatic Temperature Compensation feature.

|                 |                        |
|-----------------|------------------------|
| Scale range     | : Brix 0.0 to 33.0%    |
| Minimum Scale   | : 0.2%                 |
| Size and weight | : 3.3×3.3×20.4cm, 160g |

#### MASTER SERIES REFRACTOMETER

##### MASTER-2M Cat.No. 2323

NEW

MASTER-2M is mid-range measurement range Brix 28.0 to 62.0% model of the MASTER-M. The Master-M is a good alternative choice when the water resistant feature is not a priority and the Temperature Compensation will be carried out manually.

|                 |                        |

## MASTER SERIES REFRACTOMETER (Water Resistant & A.T.C.)

### MASTER-53 $\alpha$ Cat.No. 2351

NEW

MASTER-53 $\alpha$  is wide range model of the MASTER- $\alpha$ . MASTER-53 $\alpha$  is capable of measuring not only various kinds of juice, coffee, and other beverages but also processed food such as sauce, ketchup, low calorie jam, etc. It is an Automatic Temperature Compensation (A.T.C.) model with water resistant feature (IP65).

|                 |                                        |

| Size and weight | :3.3 $\times$ 3.3 $\times$ 16.8cm,120g                                                                                                 |

## HAND-HELD REFRACTOMETER

**N-8 $\alpha$  Cat.No. 2360**

The N-8 $\alpha$  is especially developed for very low concentration solution, Brix 8% or less. A special light filter is in place to allow for higher contrast to view the boundary line.

|                 |                                    |
|-----------------|------------------------------------|
| Scale range     | : Brix 0.0 to 8.0%                 |
| Minimum scale   | : 0.1%                             |
| Size and weight | : 4 $\times$ 4 $\times$ 21cm, 260g |

## HAND-HELD REFRACTOMETERS

**N-10E Cat.No. 2151, N-20E Cat.No. 2161**

## AUTOMATIC TEMPERATURE COMPENSATING TYPE REFRACTOMETER

**ATC-20E Cat.No. 2323**

The N-10E is a model developed for very low concentration use where the Brix is 10% or less. The scale is big, and precise measurements are possible. Good for measurements of low concentration fruit juices, etc.

|                 |                                    |
|-----------------|------------------------------------|
| Scale range     | : Brix 0.0 to 10.0%                |
| Minimum scale   | : 0.1%                             |
| Size and weight | : 4 $\times$ 4 $\times$ 20cm, 200g |

|                 |                                    |
|-----------------|------------------------------------|
| Scale range     | : Brix 0.0 to 20.0%                |
| Minimum scale   | : 0.1%                             |
| Size and weight | : 4 $\times$ 4 $\times$ 20cm, 200g |

N-20E/ATC-20E

The N-20E and ATC-20E are widely used for measuring the concentration of low density aqueous solutions such as tomato juices, fruit juice, cola, etc. The ATC-20E is an Automatic Temperature Compensating type refractometer which automatically provides correct measurement values of 20°C.

## MASTER SERIES WINE REFRACTOMETER

The MASTER-Series Wine Refractometers are used for measuring grape must concentrations.

NEW

## SALINITY REFRACTOMETERS

**S-10E Cat.No. 2412, S-28E Cat.No. 2422**

The S-10E and the S-28E are salt concentration refractometers with special scales. The units can be used for controlling the concentration of saltwater used in rinsing seafood or salinity in cooking.

Scale range : 0.0 to 10.0% sodium chloride

Minimum scale : 0.1%

Size and weight : 4×4×20cm, 200g

S-10E

Scale range : 0.0 to 28.0% sodium chloride

Minimum scale : 0.2%

Size and weight : 4×4×18cm, 170g

S-28E

## SALINITY REFRACTOMETERS (sea water) / ATC TYPE SALINITY REFRACTOMETERS (sea water)

**S/Mill-E Cat.No. 2442, ATC-S/Mill-E Cat.No. 2444**

The S/Mill-E density meter measures the salinity and the specific gravity of sea water. The salinity of sea water is displayed in parts per mille (‰) unit. The ATC-S/Mill-E model is designed with the Automatic Temperature Compensation feature which automatically provides the measurement values at the compensated temperature of 20°C (compensation range 10 to 30°C).

Scale range : Salinity 0.0 to 100.0‰  
Specific gravity 1.000 to 1.070

Minimum scale : Salinity 1‰  
Specific gravity 0.001

Accuracy : (ATC-S/Mill-E) Salinity ±1‰  
Specific gravity ±0.001 (10 to 30°C)

Size and weight : 4×4×20cm, 200g

S/Mill-E

ATC-S/Mill-E

## HAND-HELD REFRACTOMETERS (full range)

**HSR-500 Cat.No. 2340, R-5000 Cat.No. 2350**

The refractive index of a sugar solution is in proportion to sugar concentration. The model HSR-500 uses this principle, where a transmitting system is applied, to measure within a full range of Brix (0.0-90.0%). The R-5000 can be used for simple, quick and easy measurements of refractive index.

HSR-500

Scale range : Brix 0.0 to 90%  
(3-stage switching)

Minimum scale : 0.2%

Size and weight : 4×4×20cm, 600g

R-5000

Scale range : nD 1.333 to 1.520  
(3-stage switching)

Minimum scale : 0.001

Size and weight : 4×4×20cm, 600g

## BATTERY COOLANT CHECKERS

**BC-2E Cat.No. 2832, BC-3E Cat.No. 2842**

This refractometer has an exclusive scale for measuring specific gravity of battery fluid and for checking the freezing temperature of ethylene glycol and propylene glycol which are used as antifreeze mixture in automobiles, thermal catalyst for solar power systems and other industrial applications. The scale of the model BC-2E is graduated in °C while that of the BC-3E is in °F.

BC-2E

BC-3E

## COOLANT REFRACTOMETER

**BR-1E Cat.No. 2821**

This refractometer can be used for measuring the concentration and freezing temperature of ethylene glycol and propylene glycol which are used as anti-freeze mixture for automobiles, thermal catalyst for solar power systems, and other industrial applications. Designed with a dual scale, the BR-1E is ideal for field measurement.

Scale range : Ethylene glycol 0 to 70%, 0 to -50°C  
Propylene glycol 0 to 70%, 0 to -50°C

Minimum scale : 5%, 5°C

Size and weight : 4×4×14cm, 140g

## HAND-HELD ALCOHOL REFRACTOMETER

**AL-21α Cat.No. 2361**

Designed ideally to measure pure alcohol and alcohol after distillation.

Scale range : Ethyl Alcohol Concentration 0.0 to 21.0% (ml/100ml)

Minimum scale : 0.2% (Resolution 0.1%)

Size and weight : 4×4×21cm, 260g

## HAND-HELD HONEY REFRACTOMETER

**HHR-2N Cat.No. 2522**

The honey refractometer is specially designed to determine the percentage of water contained in honey.

Scale range : 12.0 to 30.0% (water content in honey)

Minimum scale : 0.1%

Size and weight : 4×4×17cm, 260g

## Technical Information

### Light Refraction

When a straw is placed into a glass of water, the straw appears bent. Now if a straw is placed in a glass with water containing dissolved sugar, the straw should appear even more bent (see illustrations). This phenomenon is known as the principle of light refraction. Refractometers are measuring instruments which put this phenomenon of light refraction to practical use. They are based on the principle that as the density of a substance increases (e.g. when sugar is dissolved in water), its refractive index (how much the straw appears bent) rises proportionately. Refractometers were devised by Dr. Ernst Abbe, a German/Austrian scientist in the early 20th century.

### Principles of Refractometers

The detection system for hand-held refractometers (transparent system) is summarized below.

- (1) In the figure below the detection is done by utilizing the refractive phenomenon produced on the boundary of the prism and sample. The refractive index of the prism is much larger than that of the sample.
- (2) If the sample is thin, the angle of refraction is large (see line "A") because of the large difference in refractive index between the prism and the sample.
- (3) If the sample is thick, the angle of refraction is small (see line "B") because of the small difference in refractive index between the prism and the sample.

### Which Refractometer to choose

Please use as a guide with a chart of back page when you choose the refractometer.

#### Known sample's typical concentration

#### About the Brix (%) Scale

All Refractometers are designed to measure the refractive index of a solution. The Brix scale is based on a sucrose (sugar) and water solution. However, since most samples contain substances other than sugar - such as salts, minerals and proteins - the Brix percentage represents the total

concentration of all soluble solids in the sample. For certain samples, such as cutting oils and other industrial fluids, a conversion chart from the Brix percentage to the sample's total concentration may be necessary.

## Measurement range for each model

## EXPLANATION OF ICONS Icons for functions, specifications and scales have been added to this catalog.
