Snapshots of some potential Jobguard™ Vinyl users* at work:

- A sushi chef prepares fresh sashimi.
- A deli clerk places roasted turkey in the slicer.
- A facilities worker mops a tiled hallway.

In work environments, such as food service, where you may want to avoid latex but still need tough, dependable manual barrier protection coupled with a natural form factor for excellent dexterity, you need Jobguard™ Vinyl.

An effective blend of strength and flexibility, Jobguard™ Vinyl is your ally in providing safe, reliable products and services and maintaining healthy working conditions. Its formulation of Polyvinyl Chloride resin (PVC) excels at withstanding the typical alcohols and fats commonly encountered in food preparation. Its ergonomic, hand-fitting design ensures that tasks requiring precise gripping control can be carried out safely and successfully. And its thickness is precisely calibrated to provide both superior protection and excellent touch sensitivity. When you need outstanding latex-free barrier protection for a wide set of applications, Jobguard™ Vinyl provides protection without compromise.

* Please consult your company policy to determine the appropriate glove for a given application.
